

IN THE CLAIMS:

Claim 1 (currently amended) A cylindrical ornamental body comprising a flexible transparent cylindrical main body made of synthetic resin and a reflective member having a reflective face inserted into said cylindrical main body.

Claim 2 (originally presented) A cylindrical ornamental body according to claim 1, wherein an air layer is provided between said reflective face of said reflective member and an inner wall of said cylindrical main body.

Claim 3 (currently amended) A cylindrical ornamental body according to claim 1, wherein said reflective member is composed of a ~~belt-like~~ belt-shaped member having the reflective face on at least one face thereof.

Claim 4 (originally presented) A cylindrical ornamental body according to claim 3, wherein said reflective member has a fixing portion which is fixed to the inner wall of the cylindrical main body at least along a side edge in a longitudinal direction thereof.

Claim 5 (originally presented) A cylindrical ornamental body according to claim 1, wherein an attaching portion is provided integrally on part of an outer side face of said cylindrical main body along a longitudinal direction of said cylindrical main body.

Claim 6 (originally presented) A cylindrical ornamental body according to claim 1 wherein said reflective face of said reflective member has a retroreflective layer.

Claim 7 (new) A cylindrical ornamental body comprising a transparent cylindrical main body made of soft synthetic resin and a reflective member having a reflective face inserted into said cylindrical main body.

Claim 8 (new) A cylindrical ornamental body according to claim 7, wherein an air layer is provided between said reflective face of said reflective member and an inner wall of said cylindrical main body.

Claim 9 (new) A cylindrical ornamental body according to claim 7, wherein said reflective member is composed of a belt-shaped member having the reflective face on at least one face thereof.

Claim 10 (new) A cylindrical ornamental body according to claim 9, wherein said reflective member has a fixing portion which is fixed to the inner wall of the cylindrical main body at least along a side edge in a longitudinal direction thereof.

Claim 11 (new) A cylindrical ornamental body according to claim 7, wherein an attaching portion is provided integrally on part of an outer side face of said cylindrical main body along a longitudinal direction of said cylindrical main body.
